Queen's Algebraic Geometry
— Seminar —

ON THE STRUCTURE OF THE ALBANESE MAP

STEVEN LU

Université du Québec à Montréal

Abstract

We will discuss some advances made on effective aspects of holomorphic and algebraic curves over semi-Abelian varieties and their applications to the structure of the quasi-albanese map.

Monday, November 16, 2009
3:00pm – 4:00pm
319 Jeffery Hall
