## COMPACT MODULI SPACES OF STABLE BUNDLES ON KODAIRA SURFACES

RUXANDRA MORARU  
University of Waterloo

### Abstract

In this talk, I will examine the geometry of moduli spaces of stable bundles on Kodaira surfaces, which are non-Kähler compact surfaces that can be realised as torus fibrations over elliptic curves. These moduli spaces are interesting examples of holomorphic symplectic manifolds whose geometry is similar to the geometry of Mukai's moduli spaces on K3 and abelian surfaces.
