STAT 464/864, Fall 2023
Crowdmark Instructions for Submitting Assignments

- The day the assignment is posted you should receive an email titled “STAT 464/864 Discrete Time Series Analysis F23 – New assignment: Assignment #” with a link box titled “Go to assignment” where you should submit your solutions to all questions.
- You can submit and resubmit each solution up until midnight of the due date of the assignment. After that time Crowdmark will still accept submissions but flag the submission with a 100% late penalty. I can adjust this penalty after the fact as appropriate.
- For each question, your solution should start on a fresh page. Write your name and student number on the first page of each solution.
- For each question, photograph or scan each page of your solution (unless your solution has been typed up and is already in electronic format), and combine the separate pages into a single file. Then upload each file (one for each question), into the appropriate box in Crowdmark.
- If you have any questions or run into problems with using Crowdmark please let me know via email.
